***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, 6-11, 15-17 and 20-25, drawn to a DNA construct for microbial cells, a method for using the construct to express multiple genes in cells, classified in class 435, subclass 71.1, for example.
- II. Claims 1-2, 4, 6-16, 18 and 20-28, drawn to a DNA construct for plant cells, a method for using the construct to express multiple genes in cells, classified in class 435, subclass 468, for example.
- III. Claims 1-2, 5-11, 15-16 and 19-25, drawn to a DNA construct for mammalian cells, a method for using the construct to express multiple genes in cells, classified in class 435, subclass 70.3, for example.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation. The different methods have different starting materials, different method steps and different end products. Furthermore, the DNA construct for microbial cells of Group I cannot be used in the method of Group II of expressing multiple genes in plant cells or the method of Group III of expressing multiple genes in mammalian cells. The DNA construct for plant cells of Group II cannot be used in the method of Group I of expressing multiple genes in microbial cells or the method of Group III of expressing multiple genes in mammalian cells. Lastly, the DNA construct for mammalian cells of Group III cannot be used in

Art Unit: 1638

the method of Group II of expressing multiple genes in plant cells or the method of Group I of expressing multiple genes in microbial cells.

Claims 1-2, 6-11, 15-16 and 20-25 link inventions I-III. The restriction requirement among the linked inventions is subject to the nonallowance of the linking claims, claims 1-2, 6-11, 15-16 and 20-25. Upon the allowance of the linking claims, the restriction requirement as to the linked inventions shall be withdrawn and any claims depending from or otherwise including all the limitations of the allowable linking claims will be entitled to examination in the instant application. Applicants are advised that if any such claims depending from or including all the limitations of the allowable linking claims are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, fields of search, and classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any

Art Unit: 1638

amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
